

The NJ Do not call list is a success. Please do not change it. I can eat dinner in peace and spend time with my family without interruption. We do have a choice, to be on the list or not. If we choose to be on the list we would never purchase anything from a telemarketer anyway. Telemarketing is a violation of one's right to privacy. If this bill is reversed or weakened it would be proof to everyone in NJ that Money is more important than what the people want. What happened to government by the people?
